Subject: FY-2015 Brownfield's Response Grant Application

Good day Mike, please find attached a copy of the application packet for the Shoshone Bannock Tribes 128(a). We are enthusiastic with continuing our 128(a) Program with US EPA Region 10. Tribes have been aggressively utilizing these resources in cleaning up the Reservation and developing our own environmental regulations. With these resources, the Tribes will be able to continue and expand clean-up efforts here on the Reservation. Earlier this year, the Shoshone Bannock Tribes were granted jurisdiction on fee land within the exterior boundaries of the Fort Hall Reservation where some of these environmental regulations will be implemented in the clean-up process.

We are looking forward to continuing and broadening these efforts across the Reservation as well as working with you and your staff to provide protection of human health and environment on the Fort hall reservation.

Please feel free to contact myself at 208.236.1049 or any of our staff here with the Shoshone Bannock Tribes. Let us know if any additional information or documentation is needed for consideration.

Sincerely;

Kelly C. Wright
Environmental Waste Management Program Manager
